FlowPilot

LOCAL-FIRST LEAD QUALIFICATION

Turn every inquiry into a clear next step.

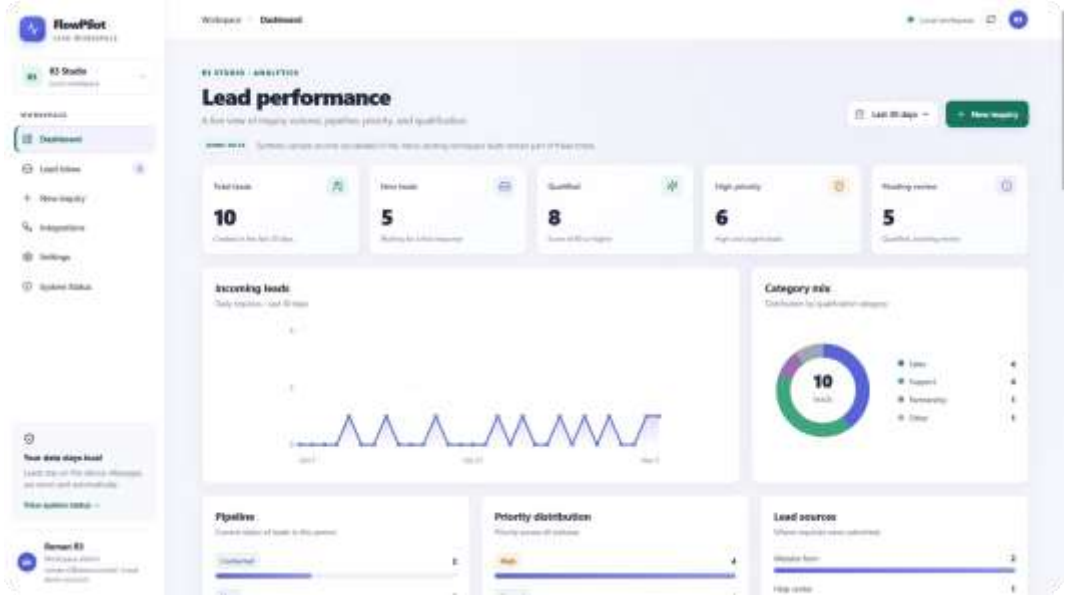

A local-first CRM that helps small teams capture, qualify and organize incoming inquiries - with AI assistance, not AI autopilot.

Managers review the context, edit suggested replies and decide what goes out. The final decision stays human.

YOUR PIPELINE. YOUR DATA. YOUR CALL.

LOCAL AI | HUMAN-APPROVED | POSTGRESQL

LIVE WORKSPACE VIEW

ILLUSTRATIVE DEMO DATA

10	5	8	6
TOTAL LEADS	NEW LEADS	QUALIFIED	HIGH PRIORITY

Dashboard trends: 7, 30 or 90 days.

A clear process. A complete record. A human decision.

Every inquiry moves through one connected workflow - without losing its original context.

HOW FLOWPILOT WORKS

01 CAPTURE
Save each lead and detect repeats.

02 QUALIFY
Generate intent, summary and priority.

03 REVIEW
Search, filter and inspect the record.

04 DECIDE
Update status and edit the reply.

LEAD INBOX

LEAD DETAILS

SEARCH

Find leads by contact or company.

FULL CONTEXT

Read messages and activity history.

MANAGE LEADS

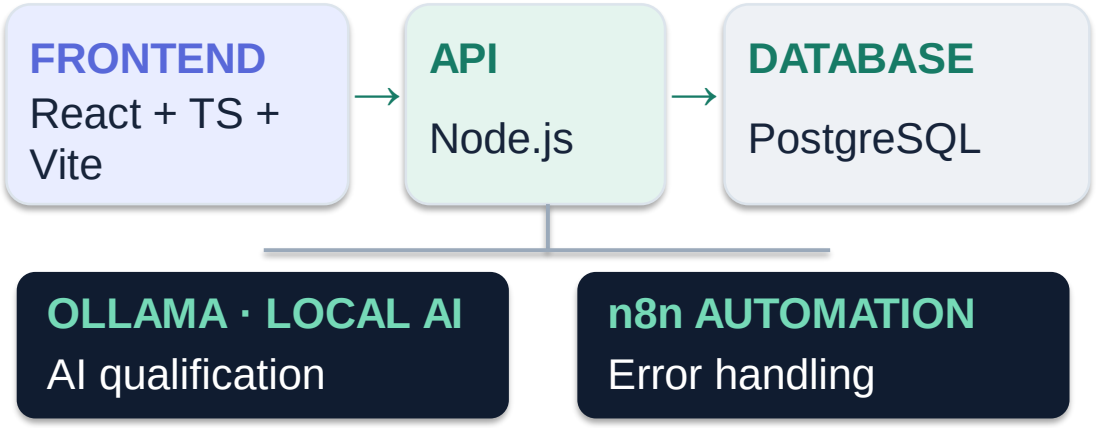

Edit replies and update lead status.

SUGGESTED REPLIES ARE DRAFTS - NEVER AUTO-SENT.

Keep data close. Keep decisions in human hands.

A connected local stack with a fallback path when the AI model is unavailable.

LOCAL APPLICATION ARCHITECTURE

Docker Compose connects the local services.

BUILT AROUND PRACTICAL SAFEGUARDS

- **LOCAL DATA & AI**
  Local PostgreSQL. On-device AI.
- **FALLBACK MODE**
  Demo Mode works without Ollama.
- **NO AUTO-SENDING**
  Managers review and send replies.
- **SERVICE STATUS**
  Health checks cover app and services.

TECH STACK

React · TypeScript · Vite · Node.js
PostgreSQL · n8n · Ollama · Docker Compose

PROJECT SCOPE

Portfolio prototype with fictional data. Tests, builds and service checks passed. No client deployment.
